

Mr Friedman

Mr Graham is on leave for
the balance of the week but
left the attached note with me.

While I do not understand
from this note just how it
is intended to control the
tubes, there is no doubt that
the system can be worked for
radio and in view it should
be covered in the patent papers.

Loewen.

Maj. Evans -
 Friedman & I were talking
 over the differential exper-
 stent and it appears that
 the same arrangement with
 out relays could be made
 with one or two ^{or three} vacuum
 tubes for radio transmitting
 & receiving. <sup>split circuits synchronized &
opposite at any instant.</sup> We believe we
 should not take this up
 in this particular patent
 but rather in another one.

G.
