

31 March 1955

~~CONFIDENTIAL~~

Dr. John von Neumann
 Commissioner
 Atomic Energy Commission
 1901 Constitution Avenue, N.W.
 Washington, D.C.

Dear John:

Herewith I enclose an advance copy of the Agenda for the 6-7 April meeting of our Board.

It would be very nice if you could possibly be present during the first and last items of the session. As for the first, General Canine will make some remarks with a view to getting the Board to undertake a study of a special problem of a non-technical character on which he would like to have some advice from the Board and perhaps some recommendations. As for the last item (report by Dr. Engstrom) you will probably be conversant with its contents but you will certainly be able to participate actively in the discussion which will ensue.

However, I know from what you told me on the telephone that you are going to be pretty busy with AEC matters on those two days and therefore if you can find any time for us, either in connection with the two items mentioned above or with any other items on the program, we shall be very glad to have you with us.

Sincerely,

WILLIAM F. FRIEDMAN
 Executive Secretary
 NSA Scientific Advisory Board
