EO 3.3(h) (2)
PL 86-36/50 USC 3605

25 May 1953

It is known that the Olivetti Company has produced cipher teleprinters which were described by [redacted] experts in 1943-1944 as being "...materially weaker than [redacted], and therefore...(not up to)...present day security demands...".⁵ The latest (1952) catalogs of the Olivetti Company are on file in the NSA-181 Technical Library.

In addition to these developments in the [redacted]

~~TOP SECRET CANOE~~~~U.S. OFFICIALS ONLY~~

On the basis of available evidence, one might assume that [redacted] [redacted] are being adapted for use on an [redacted] teleprinter. The possibility is also suggested that [redacted] may use such means of communication. The more remote possibility that current developments [redacted] foreshadow the introduction of [redacted] teleprinter encipherment throughout the entire [redacted] should not be wholly discounted.
