r

Room 47, Foreign Office, London.

8th Farch, 1942.

Ny dear Friedman,

Colonel Tiltman of whom I spoke to you is bringing this on his short visit to you. You will remember I told you he was the main spring of most of our recent cryptographic success and I am sure you will enjoy meeting him not only on technical grounds but on personal grounds.

In a reorganisation here I have attached myself more closely to all our diplomatic work leaving the various services to Commander Travis and Colonel Tiltman; but Colonel Tiltman has promised to represent me on any questions in the co-operation on the diplomatic cyphers.

In so far as French, Italian and South American work is concerned, I suggest we both continue to produce all that we can for the benefit of our respective departments and interchange results as a means of mutual assistance to our technical development. Alternatively, we could send fresh identifications in the various books on which we are working but possibly the interchange of results would serve the same purpose and also enable us to know more clearly the results we are obtaining.

I expect you are looking forward to the reopening of the golf season. If it is ever decided/

Colonel	i. F. Friedman.
