This report deals with information on 963 Short Range Intercept Coy ("HEIDE MARIE"). It is thought to be the most complete record of the unit's history as both PW WUNSCH and [REDACTED] served in it since the day of its formation. Where information clashes with details obtained from other PW (on whom no report is issued) this is also reproduced. PW could provide no fresh information on cryptography.

~~TOP SECRET~~CSDIC/CME/Y 421. PREAMBLE

WUNSCH is a regular of 32 who originally intended joining the SS. From a technical point of view his information is poor, but he provided useful details on history, WE and personalities.

Reliability : Fairly Good.

[] is a 26 year old small town lawyer's clerk who served all his time in the German Army as an operator (WT and Intercept, RT). He is not very brilliant but gave information without much fuss.

Reliability : Fairly good.

[] fits perfectly the stage type of German who has learnt English in Germany. He is a 28 year old Commercial employee from COLOGNE, very keen on languages and anxious to show his knowledge. He gave information willingly, and helped to complete the missing links in the chain of facts provided by the other two PW.

Reliability : Fairly Good.
(Interrogated by A.G.B.)

~~TOP SECRET~~CSDIC/OMF/Y 423. 963 SHORT RANGE INTERCEPT COY (NACHRICHTEN N.H.UFKL.IERUNGS KOMP.NIC = NN.K 963)(a) History and Movements

The unit, known originally as 603 Short Range Intercept Coy, was formed in Spring 42 at PORT MELLY, near P.RIS. It was U/G 5 Intercept HQ. It consisted of three short range intercept platoons, and one line intercept platoon. (This last was never in action, and was subsequently dissolved). In Sep 42 the Coy moved to two localities near CALAIS, CAMBRA and GUINES. In Oct 42 part of the unit (Pl) was sent to NOYAL PONTIVY in Brittany, and part (3 Pl) to a locality (NU) in the vicinity of DIEPPE. Coy HQ was stationed at that time at SOMMERVIEUX near B.YUEX.

When the Germans occupied the South of FRANCE, the Coy moved to NIMES (Nov 42). At beg 43 the Coy was sent to B.GNOLI near NIMES. One detachment (TRUPP) was sent from there to TUNIS, where it got captured. In Apr 43 the Coy moved once more to FRANCE, at L'ONTELLIER, where it only stayed a short time, and at end Apr/beg May 43 it transferred to POGGIO d' ORO near GUAIANO, in the ALBAN Hills. On 8 Sep 43 Coy changed location to the woods near FRASCATI. In ITALY it was under 7 Intercept HQ, and the number was changed from 603 to 963.

While in the neighbourhood of FRASCATI the Coy formed the Intercept Pl "MARIE" and attached it to the HERMANN GOERING Div in the S.LEINO sector. About end Sep/beg Oct 43 the Coy moved to the F.BRIG. DI ROMA.

In Jan 44 the Intercept Pl "HEIDE" was formed and given the A.DIL.TIC Sector to watch. The Intercept Pl "DORIS" was formed when the Allies landed in the ANZIO-NETTUNO area (end Jan 44). (Note: Other PW have stated that these Pls were the original three of the Coy, but that only cover-names and tasks were allotted afresh in winter 43/44.)

In May or Jun 44 a fourth Pl was formed, called "INGE". Personnel came from sundry Div Intercept Dets (DIVISIONS NACHRICHTEN UFKL.IERUNGS TRUPPS) and some from KNa 7.

At beg Jun 44 the Coy HQ moved to BIBBIEN in the FLORENCE area. A month later the location was changed once more to SANDRIGO near VICENZA. In Aug 44 the Coy HQ was split up and personnel divided among the Pls. Only B echelon remained as such in existence. In Sep 44, this B echelon moved to SOLIERA near C.RPI and shortly after that there took place a further splitting up of the B echelon. The heavy parts of the B echelon were sent to MANTUA. Thus two echelons were formed, Echelon I (STAFFEL I) and Echelon II (STAFFEL II) which were eventually reunited at MANTUA in Oct 44. At end Oct/beg Nov 44 Echelon I moved to GRADIZZA near COPARO, Echelon II moving to BASTIA (PADUA). Both stayed there until the beginning of the general retreat on 26 Apr 45, when comms broke down completely. Since then no news was received from either Echelon. (Note: according to information obtained from other PW, the Evaluation Office of the Coy HQ was the only part of the unit which was broken up, the rest of the HQ remaining as before.)

As at Apr 45 the four platoons were allotted to Corps, as follows:

INGE	to	XIV Armd Corps
DORIS	to	I Para "
HEIDE	"	LXXVI Armd "
MARIE	"	Ligurian Army

(b) Organisation

The WL provided for the following organisation of the unit.

OC's Party (GRUPPE FUHRER)

3 Short-Range Intercept Pls (PUNK N.H.UFKL.IERUNGS ZUGE)

1 Line Intercept Pl (DR.UFKL.IERUNGS ZUG)

B-echelon (TRUPP)

OC's Party, included the Coy HQ Staff (Ordinary Room etc), the Coy Evaluation Office (KOMPANIE AUS ARTE STAFFEL), DRs soc, a large LT Det with exchange, and a medium MT Det.

- 4 -

~~TOP SECRET~~GSDIC/CMF/Y 42

A Short-Range Intercept Pl included in addition to Pl Comdr and spare Officer or NCO (z.b.V.) and DRs (3), the Pl Evaluation Det (d/o ZUGSAUSWERTUNG), 3 WT Intercept Dots (FUNK N.H.UFKLÄRUNGS TRUPPS) of 1 Dot Comdr, 3 interpreters and 4 WT operators each (H-FUNKER), 1 DF party (PEILSTAFFEL) of 3 DF Dots (PEIL TRUPPS) of 1 NCO and 2 non each, and 1 WT (comms) Dot.

The Line Intercept Pl included in addition to the Pl Comdr and spare Officer or NCO (z.b.V.), 1 Line Intercept Officer, 3 DRs and 6 Line Intercept Dots (DR.LHT.UFKLÄRUNGS TRUPPS).

B-echelon (TROSS) included the usual personnel and services, tradosion etc.

In addition to the normal complements of English-speaking R/T operators in the Intercept Platoons, certain also had other language-speakers. The following details are known.

<u>DORIS</u>	5 Polish-speaking operators
	2 Italian-speaking operators
<u>HEIDE</u>	2 or 3 Hindustani speakers
<u>INGE</u>	Some Portuguese speakers (for Brazilian units)
<u>MARIE</u>	Some French speaking operators (when French units were in the line)

Apparently those dispositions of specialist interpreters were liable to alteration as the allied firms which they monitored were regrouped.

(c) Working Methods

Until summer 43 allied traffic was taken only for trig and practice purposes. After that W/T and R/T traffic originated by allied formations in TUNISIA, SICILY and ITALY was taken in conjunction with ERIKA and MONIK. sets, frequencies being allotted and divided among all those units. When the plns were allotted to various Corps in areas, Coy HQ had an intercept sta of its own, so that often certain links would be taken down twice, by a pl and the coy sets. In such times H-Platoon (H-ZUG) i.e. Intercept Pl of KN. 7, would reinforce Coy HQ sta. When plns left the coy, they were placed u/c of corps, or sometimes divs. Traffic taken was mostly allied armes matter, and some LOs links. A few fixed allied Navios WT stns were watched too. PW could supply no further details.

Results were transmitted in code to the Intermediate Collation Staff, either immediately (in the case of bombing target requests etc.) or daily in consolidated form, together with messages whose contents could not be deciphered. Each platoon had considerable intelligence material at its disposition, codes, call sign lists, etc. and kept complete card indices of officers' names, enemy units, frequencies, call signs, special peculiarities of nets monitored. In addition the Corps Tactical Intelligence Reports were available, giving PW statements, sitrops and casualty lists, it was frequently possible to confirm accuracy of those reports. In most cases messages intercepted could be evaluated within the platoon. The platoons also acted as evaluation centre for messages which could not be decoded at Div Intercept Secs.

Until beg Mar 45 each Intercept Platoon had a small subsec of one or two men who allotted frequencies to Div Intercept Dets (NN.T.). In Mar 45 however the number of allied active nets was so great that steering from above became unnecessary.

(d) Speed in evaluation work

PW stated that in certain cases (RT) messages could be picked up, examined and "processed" (BEARBEITET) by the evaluation sec or office, and telephoned as an "emergency call" (NOTGESSP.R.ECH) in about 60 seconds. However, often there were difficulties in LT transmission which delayed comms, and even made the passing on of information impossible.

~~TOP SECRET~~CSDIC/CMF/Y 42(o) Results

Results were summarised by PW as follows information useful for Order of Battle officers at German HQs, warning of forthcoming bombing and arty attacks, and when possible - through text evaluation - warning of own units of forthcoming infantry and/or armoured attacks.

(f) Equipment

The following equipment was used:-

To each Intercept Det available 2 x "u" sets (receiver only)
 1 x "v" "
 1 x pack set "b" OR
 "b" or "c" set

To each Intercept Pl available 1 x Field TP apparatus
 1 x Field LT "

To each DF Det available 1 x Short Range DF set
 1 x pack receiver set "b"
 (LATER 1 x DF/Receiver set "u")

Each DF Party was equipped with LT apparatus.

Each WT Det was equipped with 1 x 15 Watt transmitter, 1 x 80 or 100 Watt transmitter, 2 x pack receiver sets "b", 1 x cipher machine and LT apparatus.

(g) Training

NCOs and men in the unit received trg in the units and locations stated below.

Intercept Operators (H-FUNKER) in Intercept Depot and Trg Bn (NACHRICHTEN AUFKLÄRUNGS ERSATZ UND AUSBILDUNGS ABTEILUNG) in FRANKFURT a/m, later at SCHWÄRZENBORN. Some had been trained at the Arty Sigs School in HILLE/S. Others-DRs were trained as "zweite Hoerer" (second operator) at VOORBURG (HOLLAND) and ST. MALO, also trg in Coy.

DR Operators (P-FUNKER) first at FILBEL near FRANKFURT a/m (exact name of unit unknown), and also had trg at DF sta in APRILL, and practice work in the Coy.

WT Operators (Tast-FUNKER) as above, or in Sigs Trg Bns. Trg was also continued in the Coy and also in the WT sta of KN. 7.

Traffic Collators (VERKEHRS-AUSWERTER)

at ST. MALO, VOORBURG and at KN. 7.

Text Interpreters
 (INHALTS-AUSWERTER)

at Sigs Interpreters Depot and Trg Bn (NACHRICHTEN DOKUMENTSCHER ERSATZ UND AUSBILDUNGS ABTEILUNG) at MEISEN, later at ST. AVOLD (LUXE). Also further practical work at KN. 7 and Coy HQ.

There were NO cryptographers at Coy HQ or below.
